

Lamp Post Installation Instructions

Step 1

Determine where you want your Lamp Post.

Step 2

Dig a 12" diameter hole approximately 30" - 34" deep. (Depending on how far you want it out of the ground.)

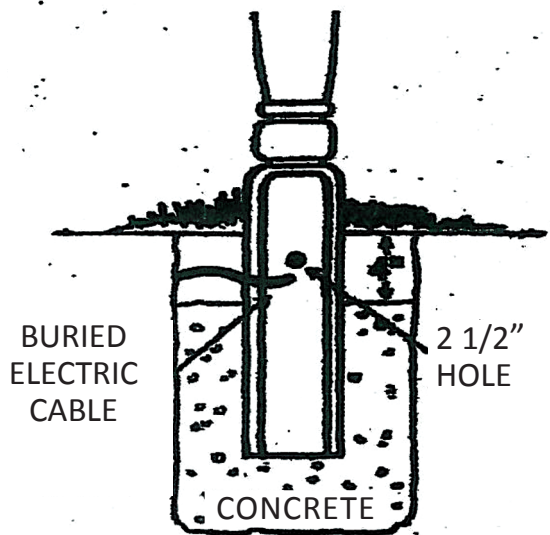

FIGURE 2

Step 3

Thread your electric cable up through the inside of post.

Step 4

Concrete the post in ground. Fill up till about 4" below ground level.

FIGURE 2

Step 5

Before installing lamp on top of post, fill post with sand if additional support is needed before installing lamp. Wire your lamp then screw the lamp on top of the Lamp Post.

Enjoy years of maintenance free lighting!
